PROFILE

Skilled and innovative software developer with 5+ years of experience, proficient in creating robust and scalable applications. Experienced in analyzing, designing, and implementing code architecture. Demonstrated expertise in optimizing and improving application performance. Detail-oriented with a passion for writing clean and maintainable code. Proven track record of delivering high-quality software solutions within deadlines. Excellent team player with effective communication and collaboration skills. Strong problem-solving capabilities and a continuous learner of emerging technologies.

EMPLOYMENT HISTORY

- ❖ Software Developer, Czerny Systems

Jan 2026 — Present
Derry, NH

 - Design and implement scalable full-stack applications and services using React, Node.js, Python, and cloud-native architectures.
 - Develop RESTful APIs and microservices, improving system reliability and maintainability through modular design and automated testing.
 - Collaborate with product managers, architects, QA engineers, and stakeholders to gather requirements and drive technical design and delivery.
 - Lead code reviews and mentor junior engineers to promote best practices for clean, documented, and testable code.
 - Manage CI/CD pipelines and deployment automation to increase release predictability and reduce manual intervention.
 - Troubleshoot production incidents and implement performance optimizations to improve application stability and responsiveness.
- ❖ React Developer, AliTech Solutions

Mar 2023 — Aug 2024
Chicago, IL

 - Built responsive React interfaces that improved user task completion and perceived responsiveness across client applications.
 - Developed multi-tier API services to integrate and surface large datasets for web apps, improving data availability and consistency.
 - Designed and deployed scalable backend components to increase throughput and support higher concurrency for client systems.
 - Collaborated with designers, QA, and product owners to deliver client-specific web applications on schedule and aligned with business needs.
 - Contributed to performance tuning and front-end optimizations to reduce load times and improve user experience.
- ❖ Front End Developer, Freelance

Feb 2022 — May 2026
Derry, NH

 - Built React front-ends and integrated APIs to reduce page load times and improve data accuracy for multiple client projects.
 - Created a reusable component library to accelerate development and simplify cross-project maintenance.
 - Implemented automated testing and CI/CD pipelines to increase deployment reliability and shorten release cycles.

- Collaborated with stakeholders to translate requirements into secure, scalable web solutions with clear business impact.

EDUCATION

❖ **Arizona State University** Jan 2026 — Aug 2026
Bachelor of Science in Data Science Phoenix, AR

❖ **Southern New Hampshire University** Apr 2019 — Jan 2023
Bachelor of Science in Computer Science Manchester, NH

SKILLS

C#	React
Python	Git
Django	PHP
Java	HTML & CSS
JavaScript	Problem-Solving and Analytical Skills
Node.js	Communication and Collaboration
